Getting Started

To create your blog, go to <http://edublogs.org>, which will bring you to the registration page. Scroll to the *Sign Up Here* button and click!

When the next screen appears, you will be asked to choose a username. You will always log into your Edublog - including future Edublogs that you create - using this original username. Your username is just about the only thing about your Edublog that you cannot later change. Add your email address, enter the verification code, and click on the *Next* button.

Tip: Be sure you type in a correct email because if you make a mistake, the username you originally chose will no longer be available. If you're using a school email, check that your district does not block Edublogs.

Username:
(Must be at least 4 characters, letters and numbers only.)

Email Address:
(We'll send your password to this address, so **triple-check** it.)
NB: Please try not to use aol.com or school email addresses as filters can stop emails from us... please use [gmail](#), [hotmail](#), [yahoo](#) or other email accounts instead.

TOS:

I Agree: ☒

Verification: 

☒ Gimme a blog!
☐ Just a username, please.

You can relax about choosing a *Blog Title* because, unlike your username, you can change the title of your blog whenever you wish. Enter your title, select your blog type (*teacher*, *student*, *other*) and click on the *Signup* button.

Blogging for teachers and students, made easy

[find out more](#)

Blog Domain:
(Your address will be domain.edublogs.org/. Must be at least 4 characters, letters and numbers only. It cannot be changed so choose carefully!)

Blog Title:

Privacy: I would like my blog to appear in public listings around this site. ☒ Yes ☐ No

Blog Type:

Language:

When the next screen appears with your URL (*i.e.*, *edubloggerfan2.edublogs.org/Is Yours*), you are almost ready to start blogging!

Blogging for teachers and students, made easy

The blog **edubloggerfan2.edublogs.org/** is yours

But, before you can start using your blog, **you must activate it.**

Check your inbox at **gdesler2@gmail.com** and click the link given.

If you do not activate your blog within two days, you will have to sign up again.

Check your email for a message from Edublogs with an activation link. Click on the activation link and head back to your email.

[Edublogs.org] Activate http://edubloggerfan2.edublogs.org/ Inbox | X

☆ **Edublogs.org** to me [show details](#) 1:09 PM (2 minutes ago) [Reply](#) | [v](#)

To activate your blog, please click the following link:

<http://edubloggerfan2.edublogs.org/wp-activate.php?key=13edec167afa665>

After you activate, you will receive "another email" with your login.

After you activate, you can visit your blog here:

<http://edubloggerfan2.edublogs.org/>

[Reply](#) [Forward](#)

A second email should be heading into your box with your password – which you will want to change (instructions on page 6). Copy your password and click on *Login* [*View your site* shows you what your visitors will see. It's not your working area (dashboard)].

Your account is now active!

Username: **Password:**

edubloggerfan2 84b3b61d

Your account is now activate. [View your site](#) or [Login](#)

Enter your username and password.

	<p>Login to your blog with the exact user name and password listed in your Edublog email. Click on the Login button.</p> <p>If you're using a shared computer, it's always a good idea to deselect the <i>Remember Me</i> box.</p> <p>Each time you visit your blog, you'll need to login. From your home page, locate the <i>Meta</i> section of the navigation bar. Click on <i>Login</i>.</p>  <p>Note: If you're already logged in, instead of <i>Login</i>, you will see <i>Site Admin</i>.</p>
--	--

Viewing Your Blog

There are two views in an Edublog: the *Dashboard*, which is your working area and the *Visit Site*, which is what visitors to your blog will see. Each time you login, you will initially enter the *Dashboard*. From this page, you can see any recent activity on your site and any recent announcements for Edublogs. In the *Latest Activity* box, you'll be able to see at a glance if anyone has made new comments to any of your posts, or if there are comments that need moderation.

The blue tabs on the left (*Write, Manage, Design, Comment, Upgrades*) will take you to the features you will use most often. On the right, are the tabs you will probably use less frequently (*Settings, Plugins, Users*). The orange bar is set to take you to *Write a New Page* (Page 6) or *Write a Post* (Page10). But first thing you'll want to do is change your password.

Note to EB Veterans: Design = Presentation.

The screenshot shows the Edublogs dashboard. At the top, there's a 'Staying Connected' header with a 'Visit Site' button. Below it are navigation tabs: 'Write', 'Manage', 'Design', 'Comments', 'Upgrades', 'Settings', 'Plugins', and 'Users'. A 'Dashboard' section contains a 'Right Now' summary box with statistics: 1 post, 1 page, 1 category, and 0 tags. It also mentions the current theme and widgets. Below this are two sidebars: 'Getting Started with Edublogs' with a list of links, and 'Your Blog' with similar statistics and storage space information.

Changing Your Password

To change your password, click on the *Users* tab.

This screenshot shows the same Edublogs dashboard, but with the 'Users' tab selected in the top navigation bar. A red arrow points to the 'Users' tab. The 'Your Profile' link in the 'Authors & Users' section is also circled in red.

Scroll down to the *New Password* section and enter your new password. Don't forget to click on the *Update Profile* button (bottom left-hand corner) in order to save your new password.

The screenshot shows the 'New Password' form. It has two input fields for the new password, with instructions to type it twice. Below the fields is a 'Password Strength' section showing a 'Too short' status and a hint to use upper and lower case characters, numbers, and symbols. At the bottom left is an 'Update Profile' button.

Changing Other Information in the Users Panel

You cannot change your username. However, you can change your display name. This is the name that is displayed by any posts that you create. You will need to select your new display name from the drop-down menu.

Your Profile and Personal Options

Personal Options

Visual Editor	<input checked="" type="checkbox"/> Use the visual editor when writing
Admin Color Scheme	<input type="radio"/> Classic <input checked="" type="radio"/> Fresh
Primary Blog:	<input type="text" value="http://blogwalker.edublogs.org/"/>

Name

Username	<input type="text" value="blogwalker"/>	Your username cannot be changed
First name	<input type="text"/>	
Last name	<input type="text"/>	
Nickname	<input type="text" value="gail"/>	
Display name publicly as	<div>blogwalker blogwalker gail</div>	

Contact Info

E-mail	<input type="text" value="gailhd@jps.net"/>	Required
Website	<input type="text" value="http://blogwalker.edublogs.org/"/>	

Note: Your email address will not be displayed on your blog where it would be visible to your readers. This information is used by Edublogs.

Click on *Update Profile* and head back to your *dashboard*.

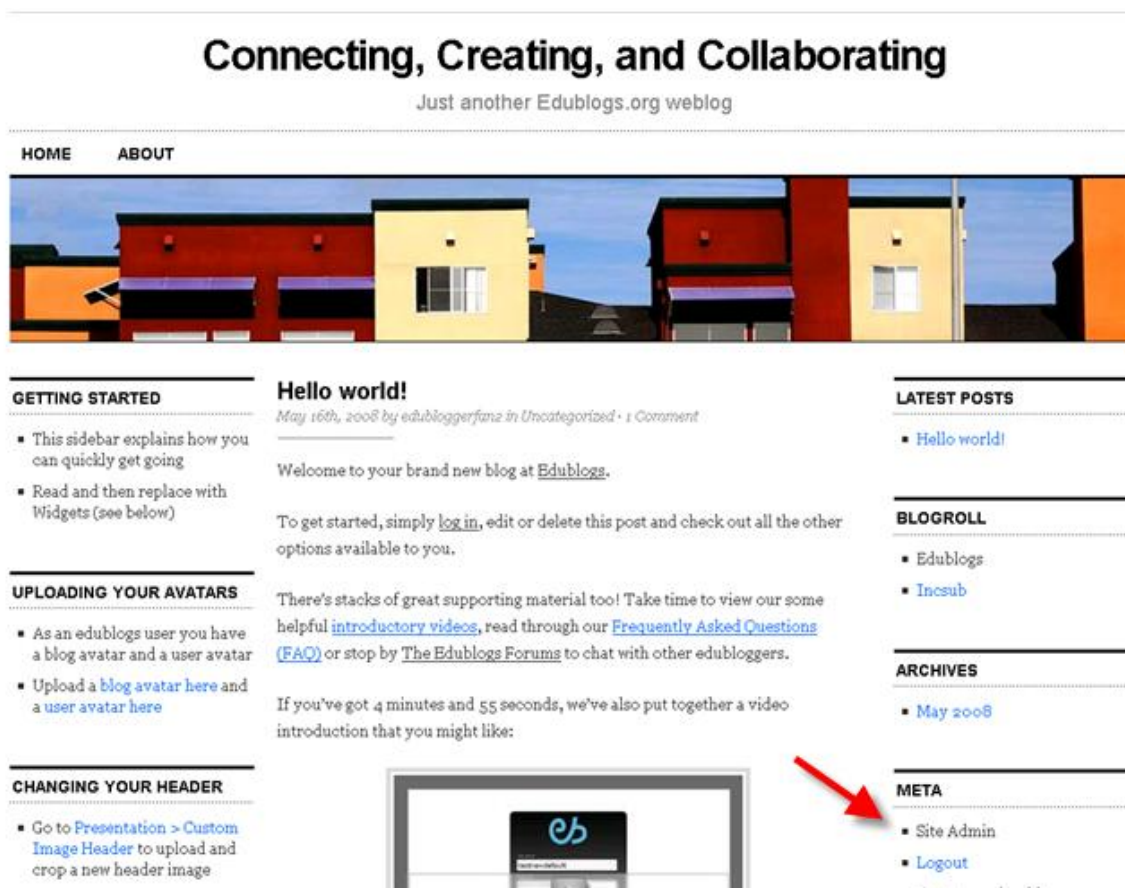

Designing the Layout of Your Blog

Everybody enters a newly created Edublog with the same default theme. To view the default design, scroll to the top of your blog and click on *Visit Site*.

You will be able to change and customize the design of your blog whenever you wish. The default theme has two sidebars (one on the right; one on the left). Posts are in the middle. In this particular theme (and in most of the themes), the image in the header can be customized.

Let's head back to your *dashboard* and take a look at the setup options – and widgets – that come with the default theme. Click on *Site Admin* to return to your *dashboard*.

From your *dashboard*, click on the *Design* tab.

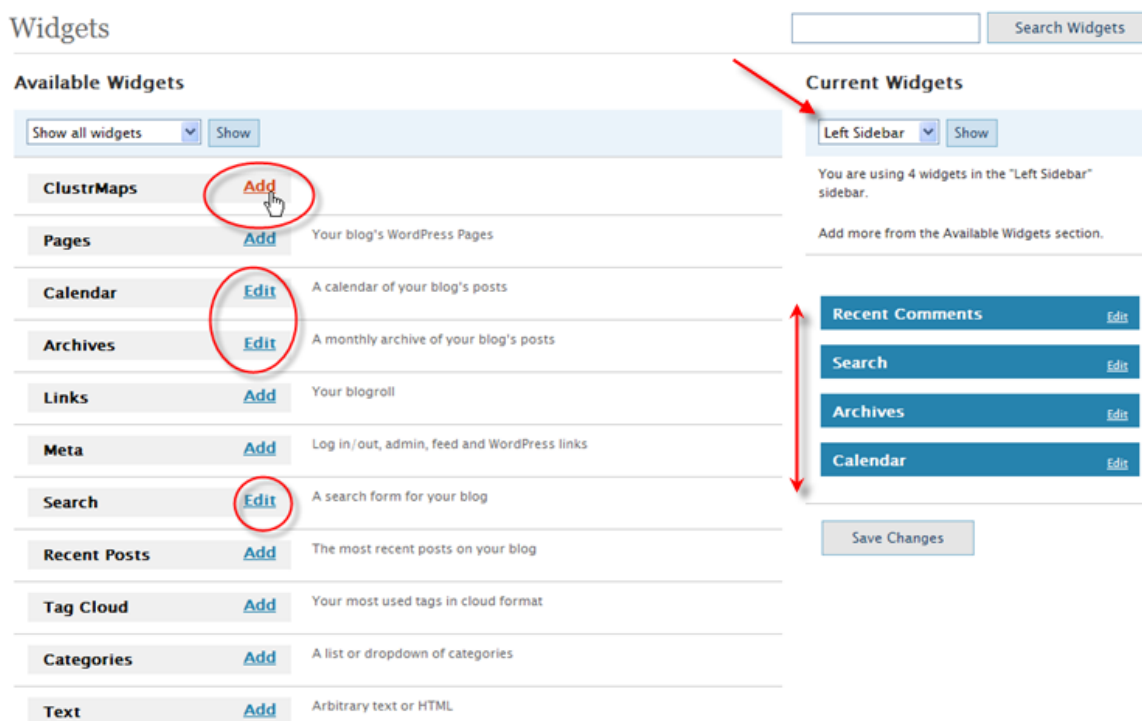

From the *Design* menu, click on the *Widgets* tab.

	<p>This is where the fun begins! New themes, along with great widgets (doodads that appear in your sidebar, such as <i>links</i>, <i>calendar</i>, <i>text boxes</i>, <i>archives</i>, etc.), are added to the <i>Design</i> menu on a regular basis.</p>
---	---

To setup your sidebar(s), use the *Current Widgets* dropdown to select *Left Sidebar* or *Right Sidebar*. Head over to the *Available Widgets* column on the left and click on the *Add* link to make your selections. Once you've selected a widget, the *Add* link changes to *Edit* and the widget appears in the right-hand column. You can drag and drop to change the order. Don't worry; you can always rearrange later. Be sure to add the *Meta* widget, as this is where you will find your *Site Admin* link for logging in or logging off. For a more detailed explanation of the Edublogs widgets, refer to the **Widget Glossary** (page 27).

To save your new setup, click on *Save Changes*.

The screenshot shows the 'Widgets' page with two main columns: 'Available Widgets' and 'Current Widgets'.

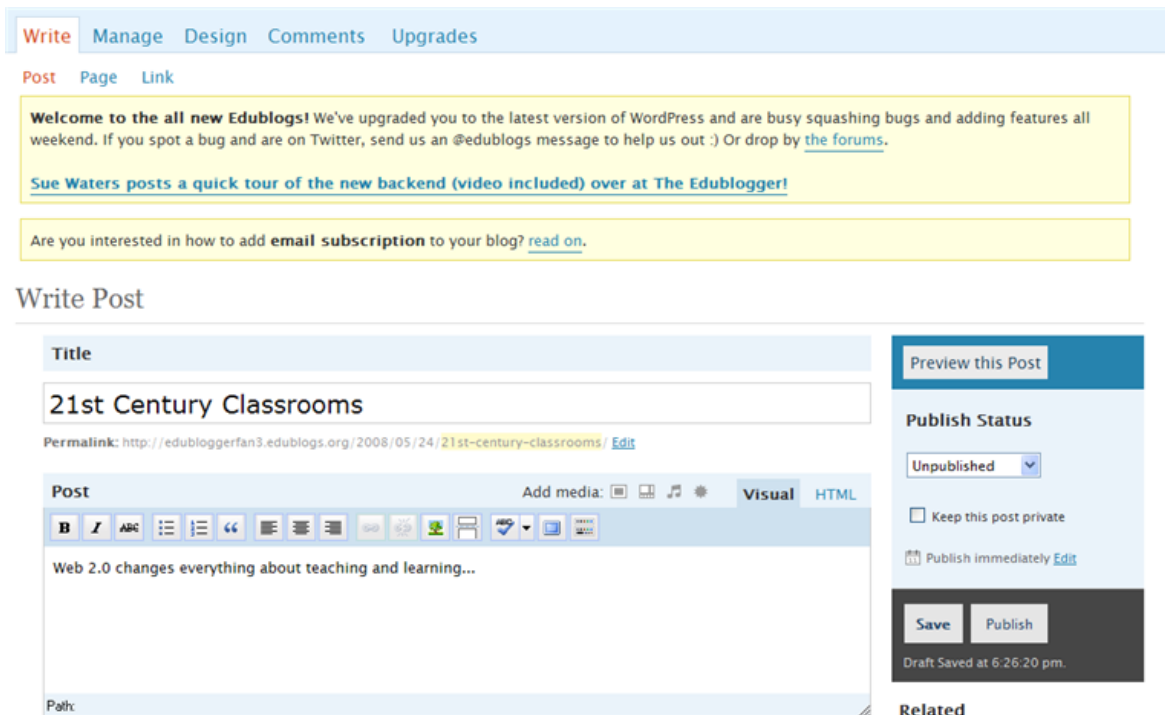

- Available Widgets:** A list of widgets with 'Add' or 'Edit' links. The 'Add' links for 'ClustrMaps', 'Pages', 'Links', 'Meta', 'Recent Posts', 'Tag Cloud', 'Categories', and 'Text' are circled in red. The 'Edit' links for 'Calendar', 'Archives', and 'Search' are also circled in red.
- Current Widgets:** A section on the right showing the 'Left Sidebar' dropdown menu. Below it, a list of currently active widgets is shown: 'Recent Comments', 'Search', 'Archives', and 'Calendar'. Each has an 'Edit' link.
- Buttons:** A 'Save Changes' button is at the bottom right. A 'Search Widgets' input field is at the top right.

To see what your theme now looks like, click on the *Visit Site* link at the top of your blog.

Writing a Post or Page

To write your first post, click on the *Write* menu, give your post a title and add your content. Before you *Publish* a post, you might want to use the *Preview this Post* option to see how it will appear to your readers. If you're not ready to go live yet, click on the Save button. The *Save* option saves your post as a draft, which you can reopen whenever you wish.

You have a number of options available in the formatting bar, such as bold, italic, and create a bulleted list. For more formatting options, click on the *Show/Hide Kitchen Sink* icon!

Editing a Post

If you have already saved and/or published a post and have closed out of the *Write* screen, return to your *dashboard* and click on the *Manage* tab. Scroll down until you find the post you wish to edit. Click on the link to open it and edit away!

Writing Pages

For the most part, you will be creating posts. If you wish to post a more static item that would not necessarily be open for comments, such as an *About Me* page, this is when you would write a *Page* rather than a *Post*. From your *Dashboard*, click on the *Write* menu and select the *Write Page* option.

Staying Connected [Visit Site](#)

If you scroll down to *Advanced Options*, you'll find some handy options such as the *Page Parent* feature, which allows you to organize your pages into subcategories, and the *Page Order* option, which allows you to organize the order in which your pages appear. Don't forget to save your changes!

Advanced Options

Custom Fields

Comments & Pings

Password Protect This Page

Page Parent

Main Page (no parent)

You can arrange your pages in hierarchies, for example you could have an "About" page that has "Life Story" and "My Dog" pages under it. There are no limits to how deeply nested you can make pages.

Page Template

Page Order

0

Pages are usually ordered alphabetically, but you can put a number above to change the order pages appear in. (We know this is a little janky, it'll be better in future releases.)

Page Author

Writing a Tweet

If you already have a Twitter account (<http://twitter.com>), you have the option of sending a *Tweet* to your "followers" directly from your Edublog. If you're not familiar with Twitter, it's a form of micro-blogging. You are limited to 140 characters per post. "It's sort of the 21st century version of the telegram" (Paul Allison). To write and send a *Tweet* from the *Write* menu, click on the *Write Tweet* link. Don't worry about exceeding the 140 character limit because a counter will be keeping track for you (lower left-hand corner). When you've finished your message, click on the *Post Tweet* button.

The screenshot shows the BlogWalker admin interface. At the top, there's a navigation bar with 'Write' circled in red. Below it, a sub-menu shows 'Write Tweet' also circled in red. A yellow banner welcomes the user to the new look. Below that, a link is provided for more information. The main section is titled 'Write Tweet' and contains a text area with the message: 'I'm almost finished updating the Intro to EB Manual. Many cool changes!'. Below the text area, a character count shows '69 characters remaining'. To the right of the text area, a 'Post Tweet!' button is circled in red.

Adding Hyperlinks to a Post (or Page)

Blogs posts often include hyperlinks, which take your readers to other blogs or websites. To create a link from your blog to the *Edublogger's Quick Tour Guide* website, for instance, start by selecting the word or phrase you wish to turn into a link. From the formatting bar, click on the chain link icon.

The screenshot shows the BlogWalker post editor. At the top, there's a 'Post' tab and an 'Add media' section. Below that, a formatting bar contains various icons, with the chain link icon circled in red. The main text area contains the following text: 'Amazing what can change with Edublogs in the course of a week! I considered deleting my previous post with its link to my "updated" EB Manual, which as of today is is already very much outdated, but decided to leave it just as proof of what a dynamic application and community the Edublogs.org is. Hope to have to have a revised manual available by the end of the week. For an update at a glance, check out [The Edublogger's Quick Tour](#) .

Type or – better yet – paste in the URL. Click on *Insert*. Whatever you selected is now underlined.

I recommend opening the *Target* dropdown and selecting the *Open in new window* option so that your readers are not directed away from your blog.

If you type in a *Title*, it will appear as a pop-up when readers mouse over the link.

To test your links, click on *Visit Site*.

Time Stamping Your Posts

A handy feature available on your Edublog is the option to change the date and time of your post. Let's say, for instance, you want to post an assignment for your students, but don't want them to view until the following week. Simple solution! Click on the *Edit* link under *Published on* (right-hand column under *Keep this post private*). The link will change from *Edit* to *Cancel* – and you will now have a dropdown calendar with date and time. Pretty cool, no?!?

Write Post

Adding Tags and Categories to a Post

Let's start by looking at the difference between a *tag* and a *category*:

"*Tags* are like your blog's index. They are keywords that represent the micro-categorization of your blog's content. To work effectively, they need to be words that people search for, called *search terms*." * Separate multiple *tags* with commas.

"*Categories* are like chapters of a book; they provide a general overview of the topics you blog about."** Just like *tags*, you can assign as many *categories* as you like. Depending on the theme you've chosen, your categories will appear above or below your post. They will also appear in your sidebar, functioning like a file draw that opens at the click of mouse to bring up all posts or pages you've assigned to a particular *category*.

The screenshot shows the WordPress post editor for a post titled "Huge Updates to EB Dashboard". The post content discusses updates to the Edublogs dashboard and manual. The "Tags" section is highlighted with a red arrow, showing the tag "Edublogs Manual, Sue Waters" and a list of tags used on this post: "Edublogs" and "Edublogs updates". The "Categories" section is also highlighted with a red arrow, showing a list of categories with "Edublogs" selected. The right sidebar contains a "View this Post" button, "Publish Status" (set to "Published"), a "Keep this post private" checkbox, a "Published on" date/time, "Save" and "Delete post" buttons, and a "Related" section with links to comments, posts, categories, tags, and drafts.

*From Lorelle VanFossen - <http://lorelle.wordpress.com/2007/09/21/tags-arrive-on-wordpresscom-blogs/>.

**From The Edublogger (Sue Waters) - <http://theedublogger.edublogs.org/>.

Adding Links to Your Sidebar(s)

To add a link to your sidebar, start by clicking on the *Links* tab in your *Dashboard*. In the *Name* box, type the name of the website (this is what your readers will see when they view your sidebar rather than the actual web address). Type or copy and paste the *Web Address*. If you add a *Description*, when your readers mouse over the link, your description will appear as a pop-up.

To organize your links under specific headings in your sidebar, scroll down the *Add Categories* link. You can create as many link categories as you like. New categories will not appear in your sidebar until you've actually assigned a link to them. If you don't feel the *Blogroll* has enough space for all your links, you could also create Pages for your links, such as a Math Page with links, or a Teacher's Resources Page.

Note: If your *Blogroll* does not appear in the sidebar, you will need to return to the *Design* screen and drag and drop the *links* widget into your sidebar.

Changing the Design (Theme)

Tired of your theme? No problem. From your *Dashboard* screen, click on the *Design* tab and head back in to select a new one.

Scroll down and click on any of the themes to update your blog. To see what your new theme looks like on your site, click on the *Visit Site* link (top of your blog, next to your blog name). Most themes are customizable, making it possible for you to change color themes, upload an original graphic in the header, etc. All themes have a selection of widgets that you can drag and drop onto your sidebar(s).

Welcome to the all new Edublogs! We've upgraded you to the latest version of WordPress and are busy squashing bugs and adding features all weekend. If you spot a bug and are on Twitter, send us an @edublogs message to help us out :) Or drop by [the forums](#).

[Sue Waters posts a quick tour of the new backend \(video included\) over at The Edublogger!](#)

Pretty much **most embedding code** we pick up around the web can be copied and pasted [directly into either our Edublog posts or a text widget in our side bar](#).

Current Theme

Edublogs Default 1.0 by [Edublogs](#)

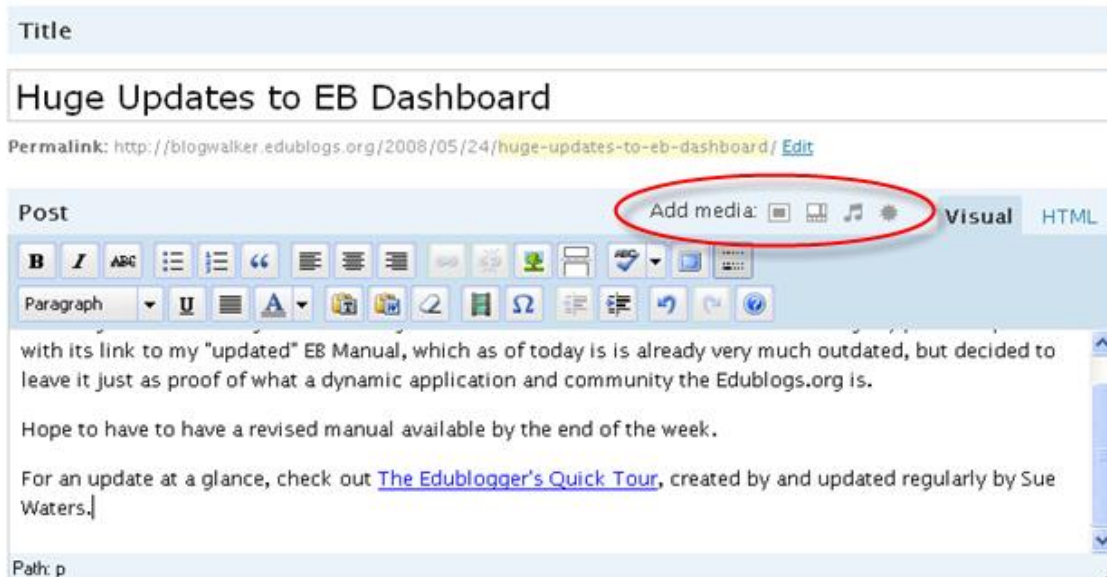

The default Edublogging theme, adapted from [Chris Pearson's](#) work.

Available Themes

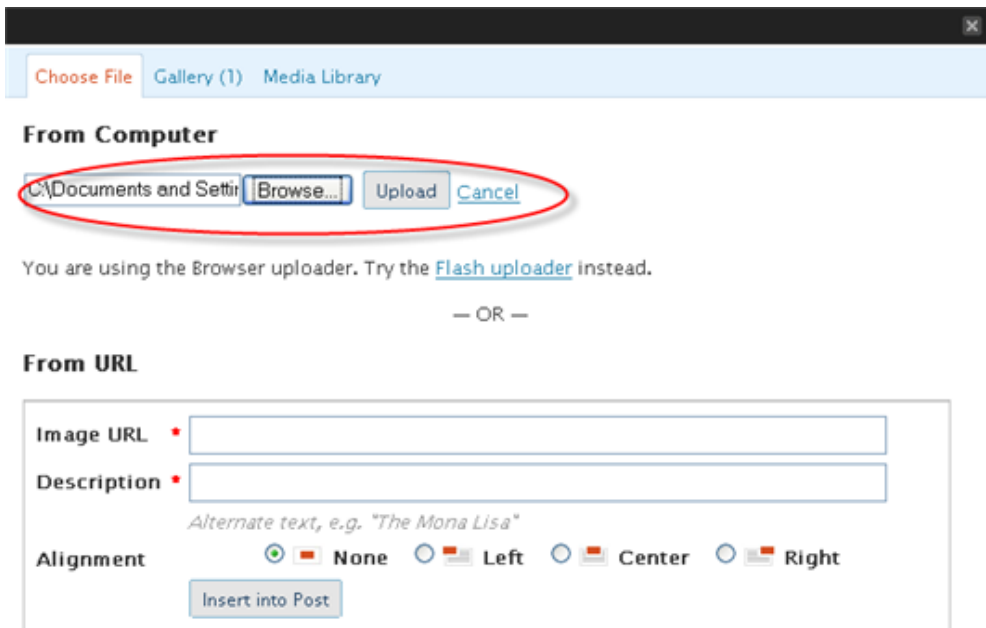

Uploading Images, Documents, or Podcasts to Your Blog

The first step to adding an image file (jpg, gif), a document file (Word, Excel, PowerPoint, PDFs), or a podcast is to browse to and upload the file to your blog. From the *Write Post* or *Write Page* panel, head up to the *Add media* section of the visual editor.

Write Post

Click on the icon of whichever media type you wish to upload (*Add an image*, *Add video*, *Add audio*, *Add media*). Browse to wherever you have saved the file, select it, and click on the *Upload* button.

Choose File Gallery (1) Media Library

From Computer

Browse... Upload Cancel

You are using the Browser uploader. Try the [Flash uploader](#) instead.

Alternate text, e.g. "The Mona Lisa"

Description

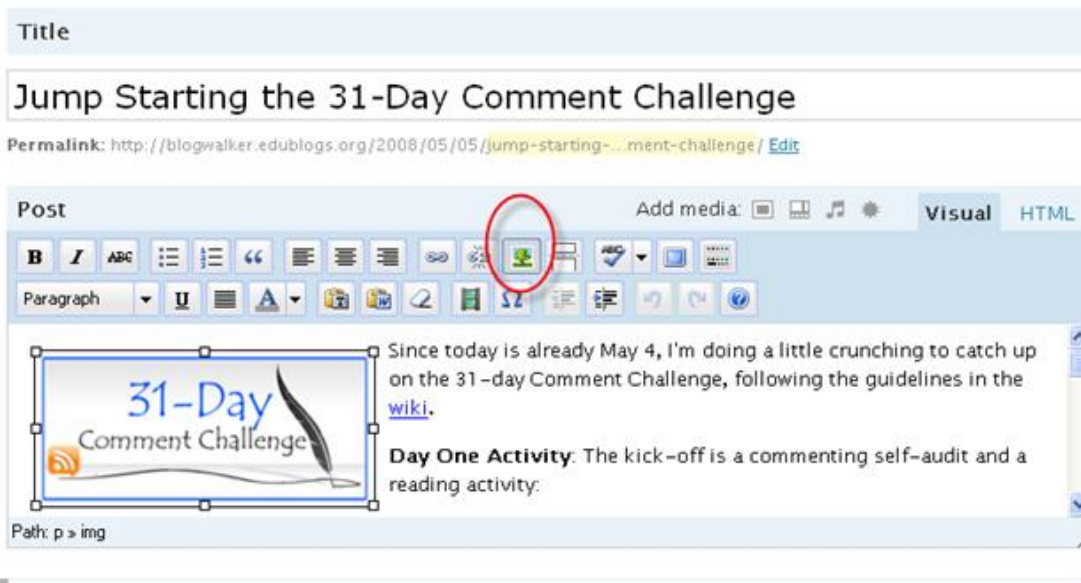

Link URL

Enter a link URL or click above for presets.

Alignment ☐ None ☒ Left ☐ Center ☐ Right

Size ☐ Thumbnail ☒ Medium ☐ Full size

You can also realign images after uploading them into a post. Select the image and then click on the tree icon.

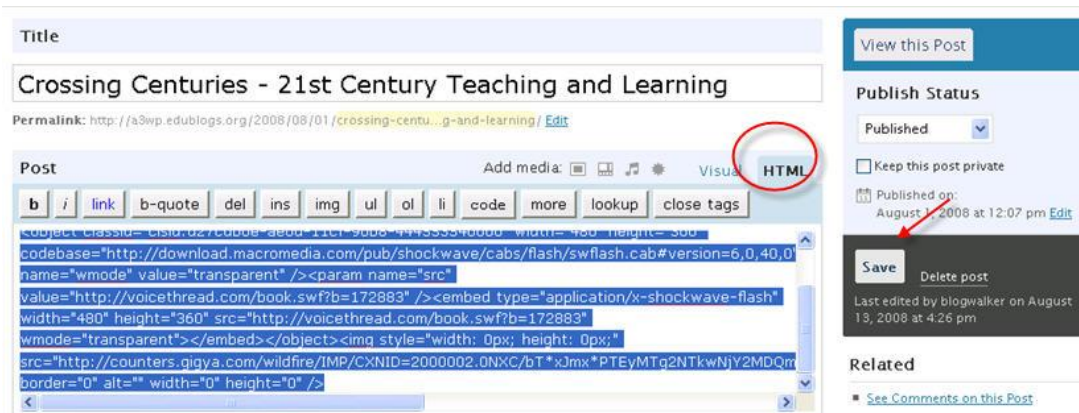

<p>The 'Insert/edit image' dialog box is shown. It has fields for 'Image URL' (http://blogwalker.edublogs.org/files), 'Image description' (comment_challenge_logo_2.png), 'Alignment' (Left), 'Dimensions' (width and height boxes), 'Border' (border box), 'Vertical space' (10), 'Horizontal space' (10), and 'Class' (alignleft). There are 'Cancel' and 'Update' buttons at the bottom.</p>	<p>From the <i>Insert/edit image</i> screen, use the dropdown menu to choose your alignment preference. You can also add some padding around your image by adding a few pixels to the <i>Vertical space</i> and/or <i>Horizontal space</i> boxes.</p>
---	---

Embedding Media

Besides linking to a media file (e.g., YouTube, SlideShare, VoiceThread), you can also embed the file. You will need to copy the embed code from the media site and then open the *HTML* editor of your post or page. Put your cursor wherever you wish the media to appear and paste it in. Save and you're done...unless you're using Internet Explorer for your browser.

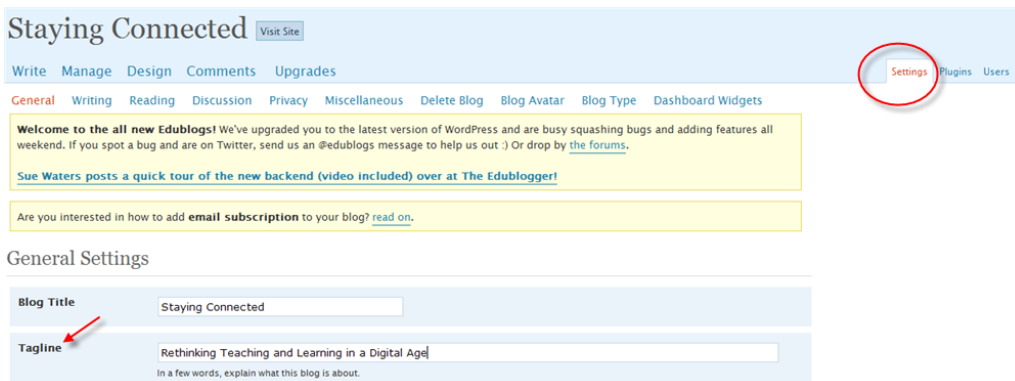

Here's a tip you will need for working with IE: Once you've pasted the embedding code into the *HTML* editor, click on *Publish* or, if you've already published this page or post, click on *Save*. Do *NOT* go back into the *Visual* editor. For some reason, with IE, if you head back into the *Visual* editor, the embed code changes, which is not good.

Changing Your Blog's Tagline

If you have selected a theme that includes a tagline, you've probably noticed that the default tagline is *"Just another Edublogs.org weblog."* To edit the tagline, return to your *Dashboard* and click on the *Settings* tab. Scroll down to the *Tagline* window and add your own tagline. Click on the *Save Changes* button.

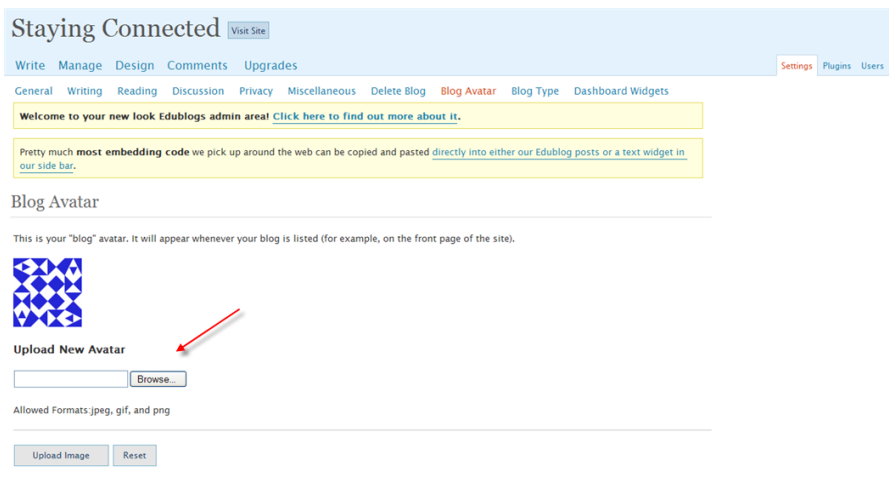

Note: Not all themes include a tagline.

Adding a Blog Avatar

An avatar is some sort of visual representation of you. You can choose an actual photo, clip art, or any image you want. You also have two avatar options: 1) *blog avatar* – appears on the front page of your blog, and 2) *user avatar* – appears when you comment in your blog, or on another Edublogs blog, or in the forum. Your *blog* and *user avatars* can be the same image or different images.

The default theme comes with an avatar. To upload your own, go to *Settings > Blog Avatar* and browse to wherever you have saved the image you wish to use. Click on the *Upload Image* button.

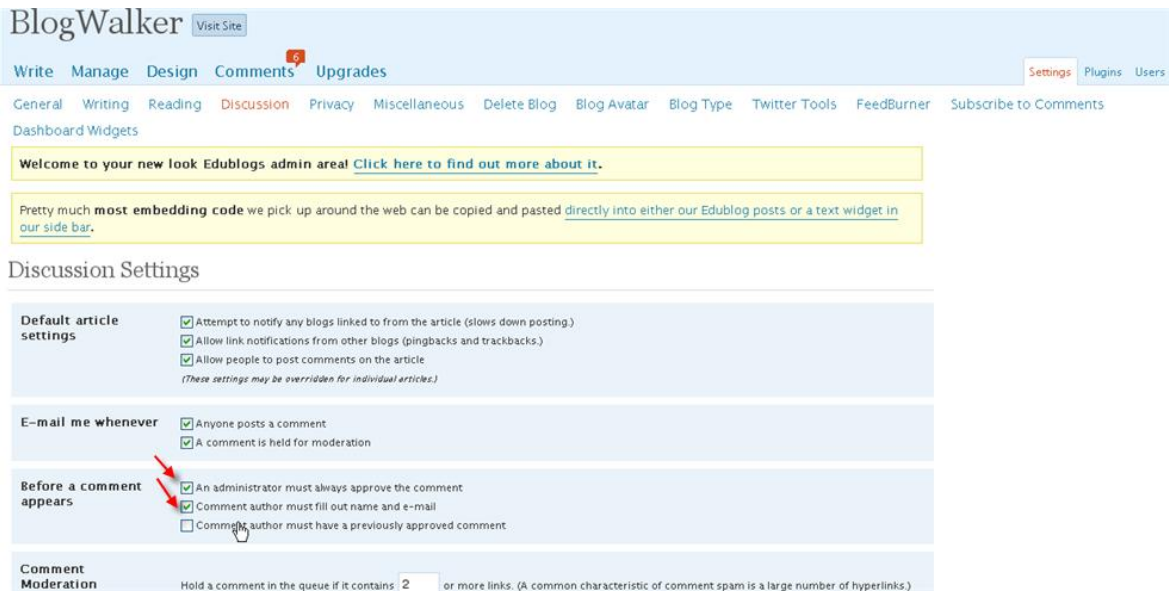

When your image uploads, you may need to do a bit of cropping before sending it out to your landing page.

Crop Image

Monitoring Your Blog

Concerned about the possibility of someone from the general public posting inappropriate comments to your blog? No need to worry because you have complete control of what is actually published to your blog. To choose your settings, click on the *Settings* tab, and open the *Discussion* menu. For maximum control, make sure the first two options under *Before a comment appears* box are checked.

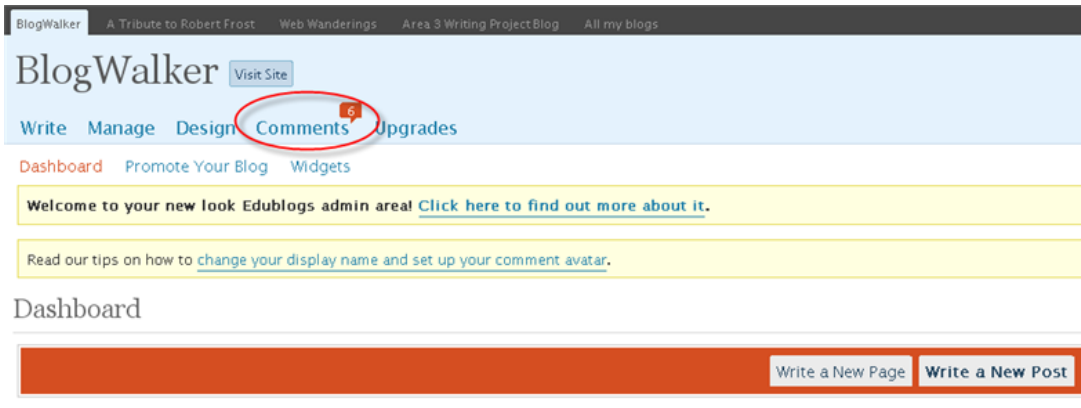

By selecting the *E-mail me whenever anyone posts a comment* option, you will receive an email message that looks something like this:

When you open the email, you'll see a copy of the comment, a link to the corresponding post, and links to approve, delete, or mark it as spam.

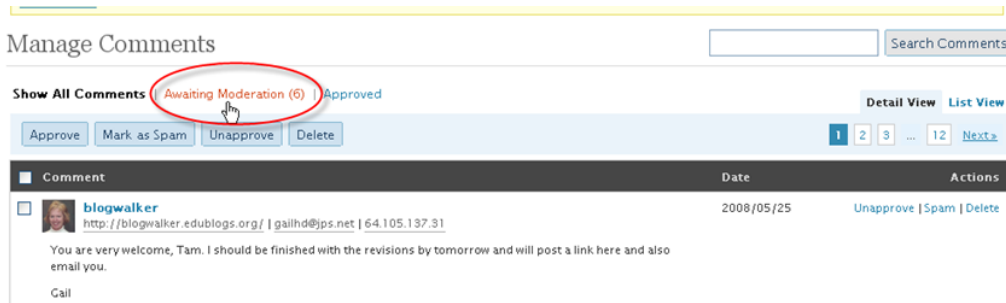

Moderating Comments

You can also moderate comments from your *dashboard*. In the screenshot below, you can see that I have six comments awaiting moderation. Click on the *Comment* link to bring up the *Manage Comments* screen.

Approving Comments

To approve a comment, click on the *Awaiting Moderation* link. Click on the selection box of the comment(s) you wish to *Approve*, *Mark as Spam*, *Unapprove*, or *Delete*. Use the buttons on the top left-hand side, or the links to the right of each individual comment.

Editing a Comment

You have the option of editing comments before approving them (e.g., deleting a student's last name, providing a little help with spelling and grammar, etc.). From the *Manage Comments* screen, scroll to the comment you wish to edit and click on the name link.

When the *Editing Comment* screen opens, you can edit content in any of the boxes.

Responding Directly to a Comment

Edublogs does not currently offer the option of commenting on a comment. But Edublogger Alice Mercer has a solution for those times you would like to respond directly to a specific comment. From the *Comments* screen, click on the commenter's name link to open the *Editing Comment* screen. Scroll down to the Comment box and add your response. You'll want to make your comment noticeably different so that it stands out from the original comment. When you've finished with your comment, select italic and/or bold to close your comment. Save your changes.

I like the link between comprehension strategies and blogging comments. These posters are aligned with Open Court... http://www.opencourtesources.com/ocr/gradex/pdfs/Comp_Strategy_Posters_2008.pdf and are slightly different but also do the job.

Thanks, Mathew. I just checked out your posters and like your graphics better.

To checkout your comment-on-a-comment, click on the *Comments* link or go to *Visit Site*.

Adding a Hyperlink in a Comment

If you're wondering how Mathew included a "live" hyperlink in the above comment, or how Sue included one in the comment below, the answer is that they both added a little bit of *html* coding on both sides of the link. Here's the code: `whatever you want to be the link`

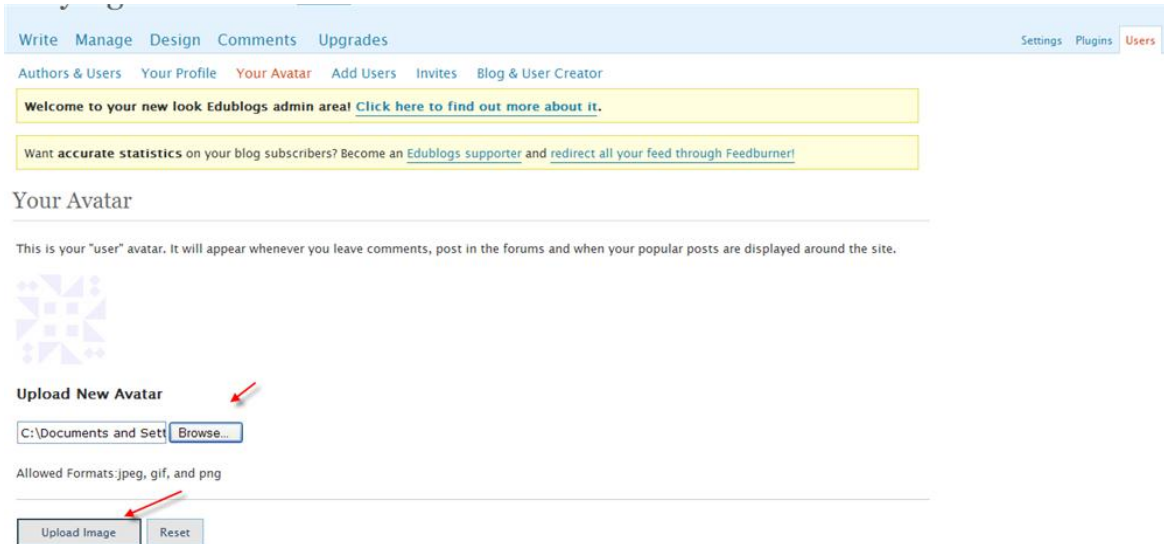

Example: `she blogs`

Sue Waters on 6 August, 2008 at 4:04 pm #

 Thanks for telling your participants about The Edublogger and glad the posts help others. Dean's post is excellent and a must read for all educators. It was Jan Smith who shared the link — here is where [she blogs](http://resiever.edublogs.org). I had read his post prior to her sharing it and had been pondering how I could write a post to encourage readers to check it out.

Adding a Comment Avatar

If you would like your avatar to appear when comment in your blog – or other Eblogger's blogs - click on the *User's* tab > *Your Avatar* tab. Click on Browse and navigate to wherever your image is saved. After you click on the *Upload Image* button, you may need to do a little cropping to fit the *comment avatar* proportions.

Adding Edublog Community Users

If you wish to limit posting comments on your blog to Edublog members only or to provide greater posting privileges to certain individuals, you will need to add their email to your *Users* list. From your *Dashboard*, click on the *Users* link > *Authors & Users*. Scroll down to the *User Email* box and type the email address. Before clicking on the *Add User* button, think about the permission level you wish to give an individual user.

When you add users, you can also determine what their permissions (capabilities) are by assigning one of five roles from the *Role* drop-down box. The default selection is *Subscriber*. A *Subscriber* can see the *Dashboard* and edit his/her own profile. That is all. A *Contributor* can draft posts but cannot publish them. An *Author* can publish posts. An *Editor* can edit other people's posts and can manage categories, links, comments, and pages. An *Administrator* can do everything. Each role is simply a set of capabilities. The *Editor* and *Administrator* roles have the capability to edit posts that do not belong to them. They can edit anyone's posts, including each other's.

Add User From Community

Type the e-mail address of another user to add them to your blog.

User E-Mail:

Role:

Note: If the people you are adding to your user community need instructions for registering with Edublogs, I've included a handout for them on page 29.

Limiting Comments to Edublog Community Members

If you wish to limit posting only to members you have added to your Edublog community, click on the *Settings* tab > *General*. Click in the *Membership* checkbox to require that users are registered (members of your community) and logged on in order to comment. By selecting the *Membership* option, anyone who clicks on the comment link for any post, will be redirected to a WordPress login box.

The screenshot shows the WordPress dashboard for a blog named 'BlogWalker'. The 'Settings' tab is selected, and the 'General' sub-tab is active. The 'Membership' checkbox is checked, with a red circle highlighting it. The text next to the checkbox reads: 'Users must be registered and logged in to comment'. Other settings visible include the Blog Title 'BlogWalker', Tagline 'Muddling through the blogosphere', and E-mail address 'efudd@jps.net'.

Edublogs Glossary of Widgets*

Archives – Having an archives widget in your sidebar is like having a file cabinet with folders organized by month and year. By clicking on a May 2006 archive link, for example, a window will instantly open displaying all your posts from that month and year – a much faster way to access previous posts than by scrolling back through months and years!

Avatar – A graphic or photo that in some way represents the blogger. Edublogs provides you with the option of uploading two types of avatars: 1) blog avatar – appears on the front page of your blog, and 2) user avatar – appears when you comment in your blog, or on another Edublogs blog, or in the forum. Your blog and user avatars can be the same image or different images.

Calendar – The calendar widget is another great organizing tool, similar to the archives link. When placed in the sidebar, the calendar widget displays the current month, with a link to previous months. Dates on the calendar that appear in bold type indicate dates that you have posted and they are hyperlinked to the actual posts.

Categories – Another great tool for organizing, the categories widget is like the drawer of a file cabinet. You can create as many categories as you wish. Each time you assign a category – or multiple categories – to a post, they will appear in your sidebar as hyperlinks to all posts you have assigned to those categories. Categories are much like a table of contents for your blog.

ClustrMaps – Your students will love this widget – and will probably improve their knowledge of world geography as they check for red dots appearing on the world map as readers from around the world visit their blog project.

Del.icio.us – Del.icio.us (<http://del.icio.us/>) is a social bookmarking tool that allows you to access your online bookmarks from any computer – and to share them with others.

Email Subscriptions – This widget makes it very easy for readers to subscribe to your blog. By typing their email address in the box and then clicking on the *Subscribe button*, they will receive an email each time you add a new post.

Flickr – Although blocked by many school districts, the flickr (<http://flickr.com>) widget allows you to display the latest photos you've added to your flickr account.

Google Search – Just one more option you can offer your readers: access to the world's most popular search engine.

Links – This links widget will be the section in your sidebar(s) for links to other blogs and websites. You can organize your links by categories (i.e., Math, English, Blogroll)

Meta – This widget provides you with a login to your dashboard. Without the meta widget, you would have to go to Edublogs.org each time you wanted to get into your dashboard.

Pages – Pages are where bloggers keep more static information (e.g., about me, blog etiquette, grading policies, etc.). Depending on the blog theme you select, pages will either appear in the sidebar or in tabs across the top of your blog. Pages always appear in a separate area from your posts.

Recent Comments – Another very motivating widget for students. When you place this widget in your sidebar, readers will see snippets of your most recently approved comments.

Recent Posts – Similar to the recent comments widget, the recent posts widget will show snippets of your most recent posts.

RSS – This widget will show up in your sidebar – or maybe in your header, depending on your theme, as a small orange icon. By clicking on the RSS icon, your readers who use news aggregators (i.e., Bloglines, Google Reader, Pageflakes) can “subscribe” to your posts and/or comments, which means, rather than receive notification via email, they open their news aggregator to see what’s new in your blog.

Search – Another handy way for readers (or you) to locate information within your blog.

Tag Cloud – This widget will check you posts for “tags,” which differ from “categories” in that they are more like items listed in an index. Generally, tags are words that are actually included in a post. If I post about a rubric for evaluating podcasts, for instance, I might tag the post with “rubric” and “podcasts” (and also assign it to a broader *category* such as “Assessment”). If you’re tagging your posts and include a tag cloud widget in your sidebar, readers will be able to see at a glance what topics you are posting about and how frequently you write about those topics, as the more frequent the tag, the larger it appears in the tag cloud.

Text – Text boxes allow you to add more than just text to your sidebar. Besides adding, for instance, a favorite quote in a text box, you can also paste in some pretty fancy JavaScript, iframes and object codes, such as the code for adding a “voki” (speaking avatar) to your sidebar.

Twitter – The Twitter (<http://twitter.com>) widget allows your readers to view your latest “Tweets” (up to 140 character, a “micro blog”) from your Twitter community.

VodPod Videos – Many districts block this widget, which allows you to share the latest videos you’ve uploaded to your account (<http://vodpod.com>).

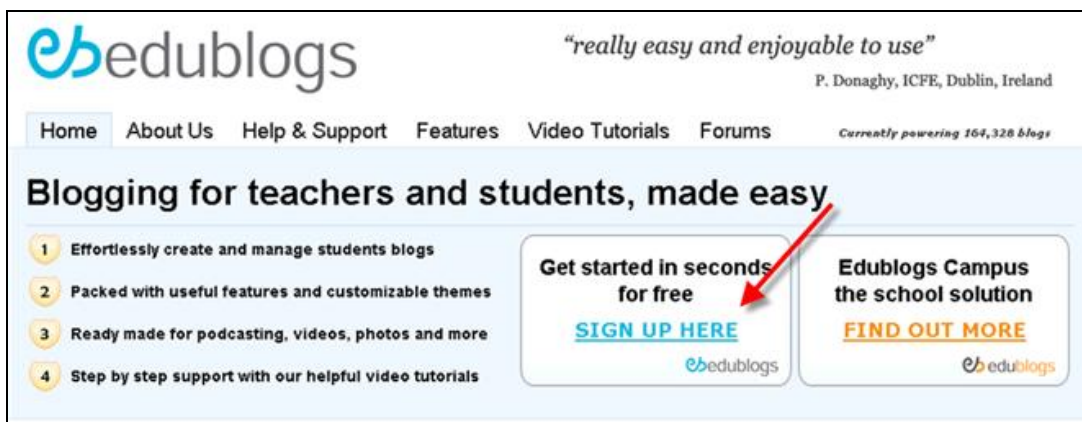

***Widgets** – “In simple terms widgets are mini web applications that you can put onto your website.” To learn more about widgets, visit “The Edublogger” tutorials at <http://theedublogger.edublogs.org/2008/01/19/getting-more-out-of-widgets/#more-19>.

Frequently Asked Questions

How to do I register with Edublogs - without setting up my own blog?

In order for you to write a post (as opposed to a comment) in another person's *Edublog*, you need to register with *Edublogs.org*. It's easy!

Step 1: Go to <http://edublogs.org>. From the opening registration page, scroll to the *Sign Up Here* button and click!

Step 2: When the next screen appears, you will be asked to choose a *username*. A *username* is the same as a login name. You will always log into an *Edublog* (including future *Edublogs* that you might create) using this same *username*. Add your email address; agree to the TOS; select *Just a username, please*; and click on the *Next* button.

The screenshot shows the registration form on Edublogs.org. The heading is "Bloggging for teachers and students, made easy" with a "find out more" link. The sub-heading is "Get your own Edublogs.org account in seconds". The form has four sections: 1. Username: A text box containing "escirocks" with a note "(Must be at least 4 characters, letters and numbers only.)". 2. Email Address: A text box containing "abanana@egusd.net" with a note "We'll send your password to this address, so triple-check it." and a note "Also, if you have a free email account (e.g., gmail, yahoo, hotmail etc.) please use that instead of an institutional email (some school spam filters can be a bit too strict!)". 3. TOS: A text box containing the terms of service, with a note "Edublogs.org is a site specifically for teachers, students, librarians, researchers, professors, administrators, corporate trainers and anyone else involved in education, by ticking the box below you agree that you fall into one of these groups." 4. I Agree: A section with a checked checkbox and two radio buttons: "Gimme a blog!" and "Just a username, please." (indicated by a red arrow). At the bottom is a "Next »" button.

Step 3: Check your email for an activation link. You will need to activate your username within 48 hours of registering. And that's it. Oh...Be sure to send whoever is adding you to his/her blog the email address you used for registering at *Edublogs*.

Blogging for teachers and students, made easy

escifan is your new username

But, before you can start using your new username, **you must activate it.** 

Check your inbox at abanana@egusd.net and click the link given.

If you do not activate your username within two days, you will have to sign up again.

Hey, what's with the content ads on EB blogs?

Last week a colleague asked me about the links to “Content Ads” that popped up when she accessed - for the first time – the Kids Book Blog (an EB site run by 5th and 6th graders at Joseph Sims Elementary School). Since I had never seen ads on any of my EB blogs or in any of my teacher trainings, I contacted Sue Waters, The Edublogger, for an explanation. Thanks to Sue and after doing a little reading in the EB Forum, I now understand that there is a very good reason for the Content Ads, and that, most likely, few of our blog readers will ever see them.

Let's start with the reasons for Content Ads:

- Remember back in October when James Farmer was upgrading EB servers? As always, the brief disruption in access to our blogs resulted in more “goodies” being added to our EB toolkit. This last upgrade, however, has exceeded James’ budget. And that’s not a good thing. But being able to count on continued membership in the EB community of educators is a very good thing – far outweighing the occasional appearance of Content Ads on our blogs.
- Only first-time visitors to your blog(s), who are not logged into Edublogs, would see the ads. On their second and subsequent visits, no ads would appear. In fact, very few people would see ads at all, but enough search engine visitors might in order to help Edublogs cover the bills and continue to grow and develop.

Let's look at why I had never seen Content Ads:

- For the last year, I’ve been an EB Supporter, which means that for a mere \$25 per year (less than the cost of one Starbucks latte per month), I not only have extra space, a few more widgets, etc., but I also *never* have ads appearing on my blog.

Let's look at why you probably do not see Content Ads on your EB blog(s):

- You will not see ads on any blog you are logged in to or have visited more than once.
- No one who has bookmarked your blog(s) or types in your URL will see any ads.
- No one logged into Edublogs will ever see any ads

Let's look at the best solution for eliminating ads from your blog(s) and supporting the EB community:

- Become an Edublogs Supporter ☺.
- Tell your fellow Edubloggers about the benefits of becoming an Edublogs Supporter☺.
